“What does Manhattan offer? An opportunity to collaborate with an amazing team, work on fantastic technology, and partner with the best brands in the world.”

Eric Clark, President and CEO

Services Organization

From design through go-live and into ongoing operations, the Services team supports customers across the full solution lifecycle. The team guides implementation of our supply chain and omnichannel software solutions and provides post-implementation assistance with real-time issues, minor upgrades, and peak-season readiness to ensure long-term success.

Services Consultant (Implementation and Support)

Work on project teams in a functional capacity to assist the customer and software developers with design, testing, integration, go-live and issue support. Serve as a liaison between clients and our software product development teams. Travel up to 50-75%.

Position Requirements

- › Bachelor's degree in Engineering, Computer Science, Supply Chain or a related technical field
- › "Hands on" work experience gained through internships and/or co-op programs
- › Exceptional interpersonal, communication and creative problem-solving skills
- › Ability to work autonomously and effectively at all levels within the company and at customer organizations

Technology Consultant (Analyst)

Work on real-world software projects from start to finish—designing, building, testing, and supporting solutions that make an impact. You'll gain hands-on experience with technical tools and methodologies while learning the fundamentals of software development and configuration. Approximate travel 50-75%.

Position Requirements

- › Four-year bachelor's or foreign equivalent degree in computer science, engineering or a related technical field
- › "Hands on" work experience gained through internships and/or co-op programs
- › Experience in a software-related technical field
- › Experience developing SQL Queries

Cloud Services Analyst

Work on a fast-paced Cloud Services Operations team, providing basic design, troubleshooting, scripting, and maintenance solutions for specialized Azure-based cloud systems. The Cloud Analyst will collaborate with international teams, external vendors, customers, and leaders within the company. The Cloud team supports multiple mission-critical applications running for dozens of global customers in Microsoft Azure. Travel up to 50-75%.

Position Requirements

- › Bachelor's degree in Engineering, Computer Science, or related technical field
- › Exposure to relational databases
- › Ability to work individually and in a team
- › Strong analytical, interpersonal, and digital communication skills
- › Willing to learn new concepts
- › Exposure to Cloud Concepts or Cloud Certification
- › Exposure to Cloud Storage, VPN Connect9ons, Serverless Logic Apps
- › Exposure to Cloud Based Identity Providers such as Azure AD or Okta

Government Cloud Operations Engineer

Work with the Government Cloud team to build specialized skills in Cloud Engineering. New additions to our team obtain a specialized Government security clearance and obtain skills in high-growth, high-demand fields including cloud architecture, infrastructure automation, cloud software, and production operations. We operate a federally authorized cloud environment focused on Manhattan's government customers, including the FEMA emergency response mission. Travel up to 50-75%.

Position Requirements

- › Bachelor's degree in Computer Science, Information Technology, or a related field.
- › Must be a citizen of the United States of America.
- › Interested in working with our talented team to quickly build valuable new cloud engineering skills.

Research and Development (R&D)

Manhattan's R&D team designs the future of our products ahead of the curve, both technically and operationally. You will be floating in the Cloud, drinking your fair share of Java, and getting creative daily. Internships available.

Software Engineer (Developers and Analysts)

Do you enjoy REST API Development, Microservices, Cloud, Kubernetes, Big Data and Machine Learning? Get involved in all of this and more while using cutting-edge technologies to deliver innovation that fuels the mission-critical supply chains of customers across the globe.

You will work on an agile/scrum team to design, document, develop, and deliver features of a continuously updated cloud supply chain application. You will develop and automate testing for these features and improve tests based on product owner and customer feedback.

Position Requirements

- 6 months or more experience with any of the following is advantageous for candidates
- Development using Java, Javascript (Typescript preferred,) Groovy, Python, Golang
- Querying Data from SQL and/or Elastic databases
- Working with Linux or Unix operating systems
- Containerization / Orchestration with Docker and Kubernetes

All positions require authorization for employment in the U.S. without sponsorship now or in the future. Minimum overall GPA of 3.0 preferred. All roles are based fully in our Atlanta office.

Work with the world's leading brands.
