Manhattan Active®
Warehouse Management

Supplier Enablement

A scalable, cloud-native, collaboration portal
for every supplier in your network

Manhattan

Manhattan Active® Supplier Enablement
for Manhattan Active® Warehouse Management

A scalable, cloud-native, collaboration portal for every supplier in your network

Modern supply chains rely on early, accurate inbound information. But many organizations work with hundreds or even thousands of suppliers, many of whom lack the technical capability to transmit ASNs or LPNs through traditional EDI integrations. For customers using Manhattan Active Warehouse Management or Manhattan Active Transportation Management, Manhattan Active Supplier Enablement brings every vendor — large or small — into a unified collaboration experience.

With intuitive workflows and built-in validations, your partners can easily create ASNs, build LPNs, print labels, and provide shipment documents that streamline receiving and reduce operational friction.

Why Supplier Enablement Matters

Stronger Inbound Visibility

✔ Understand inbound shipments earlier and at greater detail
✔ Improve scheduling, trailer selection, and labor planning
✔ Reduce variability across the inbound process

Faster, Smoother Receiving

✔ Single-scan LPN accuracy accelerates dock processing
✔ Fewer exceptions due to complete and accurate inbound shipment data
✔ More efficient put-away and labor optimization

Better Supplier Accountability

✔ Monitor vendor accuracy and compliance
✔ Use KPI scorecards to drive continuous improvement
✔ Benchmark supplier performance and elevate standards

Key Capabilities

Support Every Supplier — Not Just the Technically Sophisticated

- ✓ Ideal for large, diverse supplier communities
- ✓ Enables even the smallest or least technical vendors to provide compliant ASNs
- ✓ Reduces reliance on costly integration projects

ASN Creation
User-friendly workflow enabling suppliers to submit accurate, validated ASNs from POs — with no EDI required.

Vendor Workspace
A centralized, intuitive experience showing pending tasks and direct access to workflows.

LPN Creation & Editing
Build single- or multi-SKU LPNs with full visibility and edits until the shipment is finalized.

Vendor Scorecard
Configurable KPIs that highlight supplier performance, accuracy, and compliance.

Label & Document Printing
Generate LPN labels for streamlined receiving and print shipping documents for carrier handoff.

The Cloud-Native Advantage

Manhattan Active Supplier Enablement provides:

- A modern, intuitive portal experience
- Continuous enhancements without upgrades
- Microservices scalability capable of supporting any supplier community size
- Seamless alignment with warehouse execution processes

Turn supplier diversity into inbound advantage

Manhattan Active Supplier Enablement removes one of the most persistent bottlenecks in warehouse operations: inconsistent, late, or incomplete inbound data. By giving every supplier — regardless of size or technical maturity — a simple, validated path to provide accurate shipment information, organizations gain earlier visibility, faster receiving, and tighter operational control. The result is a more resilient inbound flow that scales effortlessly as supplier networks grow and business demands change.
